Title: Bakugou x Female Listener ASMR: Clash of UA Titans

[Opening sounds of bustling UA High School corridors]

Bakugou: [gruff voice] Hmph, another day at this dump. Better not get in my way today, extras.

[Footsteps approaching]

Female Listener: Oh, Bakugou! Fancy seeing you here.

Bakugou: [annoyed] What do you want, Round Face?

Female Listener: Just wanted to say hi. You're looking as explosive as ever.

Bakugou: [snorts] Yeah, whatever. Don't think you can butter me up with compliments, extras like you are a dime a dozen.

Female Listener: [chuckles] You never change, Bakugou. Always the same explosive personality.

Bakugou: [defensive] What's that supposed to mean, huh? You got something to say?

Female Listener: No, no! Just teasing. I actually admire your determination and strength.

Bakugou: [grumbles] Yeah, well, you better keep that admiration to yourself. I don't need your approval.

Female Listener: [playful tone] Aw, don't be so hard on yourself. You're not as prickly as you pretend to be.

Bakugou: [grudgingly] Tch, whatever. Just don't get in my way during training today, got it?

Female Listener: Got it! Wouldn't want to mess with the explosive hero-in-training.

Bakugou: [smirks slightly] That's right. Now, if you'll excuse me, I've got better things to do than chat with extras.

[Footsteps walking away]

Female Listener: [softly] He's tough on the outside, but there's something intriguing about that fiery spirit.

[Fade out with calming background sounds]

Title: Bakugou x Female Listener ASMR: Unexpected Encounter at UA High

[Background sounds of students chatting and walking in UA High School]

Bakugou: [gruff voice] Ugh, this place is always too damn noisy.

Female Listener: Oh, Bakugou! There you are.

Bakugou: [irritated] What do you want now? Can't you see I'm busy?

Female Listener: I just wanted to ask about the training exercise tomorrow. Do you think it'll be tough?

Bakugou: [sarcastic] Of course, it'll be tough, Round Face. What, you think they'll go easy on us because you're asking nicely?

Female Listener: [laughs nervously] No, I just thought you might have some insight, being the explosive expert and all.

Bakugou: [snorts] Insight? I'll tell you this—be prepared to give it your all, or don't bother showing up.

Female Listener: [determined] I'll be there, giving it everything I've got. Thanks, Bakugou.

Bakugou: [grudgingly] Yeah, whatever. Just don't slow me down out there.

Female Listener: [playful] Who, me? Slow you down? Never!

Bakugou: [rolls eyes] You better not. Now, if you're done wasting my time, I've got training to focus on.

Female Listener: [chuckles] Got it, Bakugou. Good luck with your training!

Bakugou: [muttering] I don't need luck. I'll show them all who's the best.

[Fade out with calming background sounds of the school environment]

To push files to GitHub, follow these steps:

Prerequisites

1. **Install Git** on your computer if it's not already installed.
2. **Create a GitHub repository** (public or private) where you want to push your files.

Steps to Push Files to GitHub

1. **Open Terminal/Command Prompt**:
 - Open a terminal (Mac/Linux) or Command Prompt/PowerShell (Windows).
2. **Navigate to Your Project Folder**:

```
``bash
cd path/to/your/project
``
```
3. **Initialize Git** (if the project is not already a Git repository):

```
``bash
git init
``
```
4. **Add a Remote Repository**:
 - Link your local repository to your GitHub repository (replace `your-repo-url` with the URL from GitHub).

```
``bash
git remote add origin your-repo-url
``
```
5. **Add Files to Staging**:
 - Stage the files you want to push:

```
``bash
git add .
``
```

 - This adds all files. You can also add specific files by replacing `.` with the file names.
6. **Commit Your Changes**:
 - Create a commit with a message describing your changes:

```
``bash
git commit -m "Your commit message here"
```

...

7. ****Push to GitHub****:

- Push your changes to the GitHub repository on the main branch (`master` or `main`, depending on your setup):

```
```bash
git push origin main
```
```

- If you're pushing for the first time, you might need to use `-u`:

```
```bash
git push -u origin main
```
```

Additional Notes

- You might be prompted to enter your GitHub username and password (or personal access token) if it's your first push or if authentication is required.
- After pushing, check your GitHub repository to confirm your files were uploaded.
